# TOOLS HOLDERS

## 5.1

Linear movement	6
Rotary movement	12
Holders for polishing discs	12
Mandrels for rotary movement tools	16

Holders for linear and rotary movement tools that facilitate the use of abrasives and polishing accessories.

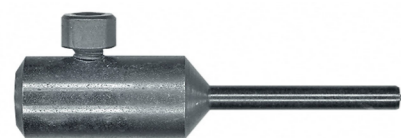

The entire range is made of extra-resistant materials such as steel or impact-resistant plastic to slow down the wear rate of tools.

## LINEAR MOVEMENT TOOLS HOLDERS

Linear movement tool holders are a high performance and precise solution for the mold polishing industry. Thanks to their robustness and flexibility, they allow to obtain high quality finishes on surfaces of different materials, minimizing tool wear and improving productivity.

### ADAPTER COLLET FROM Ø 4MM TO Ø 3MM SHANK

## ROTARY MOVEMENT TOOLS HOLDERS

Rotary tool holders offer the possibility to use a wide range of abrasives, such as ground canvas, felt, and self-adhesive cloths, to perform roughing, grinding, and polishing operations on surfaces of different materials. Thanks to their robust and precise structure, these supports guarantee high processing quality and reduced production time, increasing the efficiency of the production process.

### HOLDERS FOR POLISHING DISCS

The range of holders for abrasive discs contains standard products and supports for quick-release discs. The latter is designed for discs with SocAtt and Fast-Lock attachments that speed up the change of abrasive discs. In some cases, it may be necessary to finalize the holder with the pin marketed separately.

## ROTARY MOVEMENT TOOLS HOLDERS

### MANDRELS FOR ROTARY MOVEMENT TOOLS

Mandrels for rotary movement tools offer a reliable solution for fixing and using various accessories on rotary tools such as diamond discs, felts, and abrasive rubbers. Made of high-quality materials, these tools guarantee a firm and safe grip during cutting and polishing operations. Compatible with different mounting sizes, the spindles allow quick and easy change of accessories for greater versatility and precision in applications.
